

ORSI AND ARMANI'S  
PATENT METALLIC LAVA,  
BROWN, WHITE, AND ORNAMENTAL,

AND  
SEYSSSEL ASPHALTE.

Messrs. O. and A. beg to inform ARCHITECTS, BUILDERS, &c. that in addition to their BROWN LAVA for Roofs, ceilings, &c. and their WHITE and ORNAMENTAL LAVA, for interiors of churches, halls, museums, vestibules (and in consequence of CLARIDGE'S PATENT for SEYSSSEL ASPHALTE having expired), they are now ready to contract for work to any extent in GENUINE SEYSSSEL ASPHALTE, imported by them from the original mines of Seyssel, and by their List of Prices, Architects, Builders, and Contractors will see a GREAT REDUCTION from those of any other importer.

A GUARANTEE IS GIVEN for work executed by O. and A. for THREE YEARS, free of any expenses. For particulars, samples, and list of prices, at the Office, 6, Guildhall-chambers, Basinghall-street, City. July, 1863.

THOS. HAWKINS begs to inform Builders, Painters, and the Trade generally that he has now on hand a large quantity of his newly patented Best Portland Cement, new principle, and warranted to stand any test. One trial will sufficiently prove the superiority of this brand over any other cement now in use by the trade. Terms, cash.—Address, THOMAS HAWKINS, 1, Victoria-terrace, Bishop's-terrace, Haverhill.

GUTTA PERCHA TUBING.—Many inquired having been made as to the durability of this tubing, the Gutta Percha Company have pleasure in drawing attention to the following letter, received from Mr. G. Hackett, Surgeon, to the Duke of Bedford:—"Office of Works, Whitehall Palace, Jan. 11, 1863. 'In answer to your inquiry respecting the Gutta Percha Tubing for Pump Stations, I find that the water has not affected it in the least, although it will last through in two years; we have adopted it largely, both on account of its being cheaper than lead, and more perfect job. Yours, &c. C. HACKETT.'"

N.B. The Company's Illustrated Circulars, containing instructions to planters for joining tubes, lifting tanks, &c. will be forwarded on the receipt of a letter from the Company.

THE GUTTA PERCHA COMPANY, FINESTEELE'S WHARF-ROAD, CITY-ROAD, LONDON. Wholesale City Depot, Messrs. ROGERS and KEY, 100, Newgate-street.

A SAVING OF TIME AND MATERIALS, with safety of building.

MR. HAN COUGH'S PATENT PORTABLE STEAM-ENGINE, 2, 3, 4, and 6-horse power, for grinding mortar, raising building materials, driving circular saws, pumps, &c., at Albert-street, Manchester.

TESTIMONIAL from Charles Barry, Esq., R. A., Great George-street, Westminster: London, 10th Dec. 1862. Mr. Nathan Gough.

Sir,—I have, Mr. Barry, the pleasure of replying to your request of the 10th inst. for a certificate of the working of three steam-engines you have supplied to the New Houses of Parliament at Westminster, by saying that they have fully answered the purpose for which they were required, in building the building materials, and two of the three have been in work for some years, with very little repair, and with considerable economy of fuel.—I am, Sir, your obedient servant.

Per pro CHARLES BARRY, ALFRED NEEDS.

FIRE-PROOF CONSTRUCTION.—FOX and BARNETT'S PATENT.

The great advantage of a fire-proof construction is shown by the recently published returns of fire in London during the past year, by which it appears that there is a considerable increase as compared with former years, the number actually exceeding 1,000, or an average of three per cent.

This result affords strong corroboration of a fact stated by high authorities, THAT NO BUILDING IN WHICH TIMBER JOINTS ARE USED IS PRACTICALLY SECURE FROM THE DANGER OF FIRE; and when this fact is added that timber is also liable to dry-rot and the ravages of insects and vermin, for which it affords a ready harbour, the mischief arising from its extensive use will be sufficiently apparent.

It becomes, then, worth the attention of those who are interested in building, to inquire whether materials of an imperishable nature cannot be substituted for timber in the construction of houses, without incurring additional cost and other inconveniences.

A number of buildings of all classes, either finished or in course of erection, upon the above improved system, in which joints, instead of being made of wood, are substituted for timber, together with solid and permanent construction adapted to receive a finished surface of floor or roof of any kind.

Among the buildings at present in progress in London on this system is the new GUY'S HOSPITAL, an extensive new building, with accommodation for 200 additional beds; and for building of this description and magnitude, as well as for PRIVATE DWELLING-HOUSES, OFFICES, WAREHOUSES, &c. it is now possible to give great advantage to the Proprietor.

A detailed description of the system, estimates, and all further information, may be obtained on application to the Proprietor of the patent.

MR. BARRETT (late Fox and Barnett), 15, West-building, Adelphi, whose offices form part of a building, and in his premises, and where specimens of the rolled iron joists may be seen.
